PROFESSIONAL SUMMARY

Systems Engineering student at ABET-accredited Universidad Icesi, with an emphasis in Software Architecture and Management. Combines technical training in backend development, databases, containerization, and CI/CD pipeline automation with experience leading strategic communication and brand positioning for student organizations of over 5,000 people. Professional area of interest includes artificial intelligence engineering and systems architecture; currently researching governance and quality assurance mechanisms for agent-assisted development frameworks (BMAD).

EDUCATION

Universidad Icesi Cali, Colombia

Systems Engineering — ABET International Accreditation

Emphasis: AI Engineering and Software Architecture

Study Abroad: Toronto, Canada

Canadian Language Learning College — Professional Working Proficiency (English)

Mar. 2022 – Sep. 2022

SIGNIFICANT EXPERIENCE

Associations

IEEE Student Branch, Universidad Icesi — Marketing & Identity Lead

Feb. 2026 – Present

- Directs the branch's identity and digital content strategy, showcasing its technical excellence under IEEE's international standards.

Student Council, Universidad Icesi — Communications and Marketing Delegate

Jul. 2025 – Jun. 2026

- Led the narrative and positioning of Council projects for a community of over 5,000 students.
- Acted as a strategic bridge between the student body and university leadership, facilitating the viability and visibility of institutional initiatives.
- Oversaw brand consistency and digital dissemination strategy to maximize the impact of campus activities.

Relevant Projects

BMAD-GovernanceLayer — Project — Universidad Icesi — Co-author and Affiliated Researcher.

Aug. 2026

- Designing and implementing a governance layer for agent-assisted development frameworks that integrates Definition of Done, non-functional requirements validation, UI/UX design adherence, and ATDD/TDD discipline as verifiable controls throughout the story lifecycle.
- Characterizing technical debt generated in agent-assisted development workflows and proposing verifiable quality controls in response.

Cadena & Asociados — Corporate Website — Architect and Developer

2026

- Migrated a law firm's website from WordPress to Next.js 15 with Tailwind v4, automatic internationalization based on visitor region (next-intl), and native technical SEO.

SKILLS AND INTERESTS

Languages and Frameworks: Java, Python, TypeScript/JavaScript, SQL, Scala · Spring Boot, Django, Next.js, React, Tailwind CSS.

Data and Infrastructure: PostgreSQL, MySQL, MongoDB · Docker and Docker Compose, GitHub Actions (CI/CD), Git, Linux (Ubuntu), SSH, Nginx.

Architecture and Methodologies: Clean Architecture, design patterns, software development lifecycle (SDLC), agile methodologies, ATDD/TDD, Spec-Driven Development, BMAD.

Tools: Jira, Excel, Word, Figma, Canva, Notion, Google Suite.

Soft Skills: Team leadership and management, assertive communication, stakeholder management, analytical and critical thinking, multiple priority management, cross-cultural adaptability.

Languages: English — C1 (Professional Working Proficiency).
